## Profile

Senior Mobile Developer with 5.5+ years of experience in Native Android and cross-platform mobile application development. Strong expertise in Kotlin, Jetpack Compose, MVVM, Clean Architecture, Coroutines, Hilt, and React Native.

Passionate about building scalable, high-performance, and user-centric applications while writing clean, maintainable, and well-tested code. Proven track record of taking ownership of end-to-end feature development, solving complex technical challenges, and delivering impactful solutions in agile environments.

A continuous learner with a strong focus on software architecture, performance optimization, accessibility, and delivering exceptional user experiences.

## Professional Experience

**Lloyds Technology Center** 12/2023 – present | Hyderabad, India

Software Engineer II

- Leading the Android development efforts within the Spending Rewards feature team, driving technical decisions, feature delivery, code quality, and collaboration across cross-functional teams.
- Contributing to the development and enhancement of large-scale banking applications using Kotlin, Jetpack Compose, Coroutines, MVVM, Clean Architecture, Dependency Injection (Hilt/Dagger), and comprehensive unit testing with JUnit and MockK.
- Led the end-to-end development of the **Spending Rewards** feature from scratch, including architecture design, implementation, GCP API integrations, testing, and production release. The feature enables customers to redeem cashback directly into their accounts, activate cashback offers, and track reward transactions through a seamless user experience.
- Architected and developed the feature using a scalable **Android SDK and modularized architecture**, enabling code reusability, maintainability, faster build times, and independent feature ownership.
- Serve as a **Code Owner** for the Android codebase, conducting PR reviews, enforcing engineering standards, mentoring developers, and providing architectural guidance across both the feature team and other Android teams.
- Developed an **AI-powered PR Review Agent** incorporating organization-specific Android standards, Kotlin best practices, architecture validations, and unit testing rules, helping improve development productivity and code quality at scale.
- Delivered multiple post-MVP enhancements including **Featured Offers**, **Filter & Sort**, **Custom Intercept Surveys**, and **Cashback Transaction History**, significantly improving user engagement, feature discoverability, and customer experience.
- Collaborate closely with Product Managers, Designers, Backend Engineers, QA, and Engineering Leadership to deliver high-quality, scalable, and customer-focused mobile solutions.
- Drive engineering excellence through clean code practices, performance optimization, accessibility improvements, technical mentoring, and continuous process improvements.

**Educational Initiative** 09/2021 – 11/2023 | Bangalore, India
Software Engineer

- Worked on React-Native Framework for Mindspark Mobile Application and in SpringBoot & microservices for Backend Development
- Ei Mindspark is an AI-powered personalised adaptive online Maths learning .platform that effectively allows students to advance at their own pace. Ei Mindspark delivers over 2 million questions every day, and the data collected is used to enhance a child's learning pathway .
- Implemented Trusted Device Features, OTP Login, Screening Test , Dual Login flow etc . Made Responsive UI and Student Interactive Application with bug free Worked on various concept like WebView with strong Iframe , State Management for the App , B2C , B2B Modal , Firebase Crashlytics .
- Worked on MVVM/MVC architecture , Done some POC on Flutter for MindSpark.
- Worked on Redux/Mobx state management library , Mixpanel Implementation etc Reduced Mindspark Application Size from 32mb to 25mb by removing third party packages and made custom implementation instead .
- Optimised the application and made 30% fast from the older with updated react-native version and 0 sonarqube code smell bugs .
- Application Link : https://play.google.com/store/apps/details?id=com.mindspark.edicine

**MoneyTap** 06/2021 – 09/2021 | Bangalore, India
Software Engineer

- Done Some POC on Flutter , Android with kotlin for MoneyTap Fintech applications.

**Appventurez Mobitech** 01/2021 – 06/2021 | Noida, India
Software Developer Intern

- I worked on Android with Java for AstroBaBa Mobile Application .
- I worked on MVVM architecture , Room database for local , Cloud messaging Integration of Api , Live Chat , Push Notifications .
- Made Responsive and User Interactive Application with bug free .
- Application Link : https://play.google.com/store/apps/details?id=com.ev.live&pli=1

## Education

**Master Of Computer Application** 2018 – 2021 | Keral, India
National Institute of Technology Calicut
**CGPA - 7.94**

**Bachelor Of Computer Application** 2015 – 2018 | Patna, India
Admerite College (Magadh University)
**Percentage - 64.2%**

## Skills

- Data Structure and algorithm
- JavaScript/TypeScript
- OOps
- Mobile Development
- Solid Principle
- Jetpack Compose
- SQL
- React Native
- Git
- Java
- Android Architecture
- Android Modularization
- Problem Solving
- Android
- FireBase
- Kotlin
- Mobile System Design

## Languages

English ●●●●○ Hindi ●●●●●

## Awards

**Engineering Excellence Award From Lloyds Technology Center (2026)**
- Recognized with the Engineering Excellence Award (Q1) for proactive support, ownership, and resolving critical Android production issues.

**Work Appreciation from Lloyds Technology Centre (2025)**
- In appreciation of their exemplary behaviour and positive attitude aligned with the values and culture of Lloyds Technology Centre.

**EI Maestro Award (Educational Initiative'23)**
- For exceptional work in stabilising the Mindspark Mobile App, reducing code issues, enhancing security, and delivering innovative . solutions, showcasing his mastery and significant contributions to technology and development.

**Devathon Event in EI (2023) ( Runner Up In Devathon )**
- I have reduced the production app build size from 32mb to 23 mb in two day that was built in react-native frameworks (Mindspark applications) . Optimised the application and made 30% fast from the old .

**Winner in PHOENIX (Version 2019)**
- Hackathon competition held during NIT Trichy MCA Technical Festival(2019)

**Runner Up in KRYPTHON (Ignite 2019)**
- Hackathon competition held during NIT Surathkal MCA Technical Festival (2019)

## Coding Profiles

**GeeksforGeeks**

**LeetCode**

**InterViewBit**

**HackerRank**

## Interests

- Competitive programming
- Backend Development
- Mobile Development
- Problem solving with optimise solutions
