RAJU KUMAR

Senior Android Engineer

rajupraaa1234@gmail.com | 7903241183 | Hyderabad | Portfolio | Linkedin | Github

PROFILE

Android Engineer with 5.5+ years of experience designing, developing, and delivering high-quality Android applications across banking, fintech, and ed-tech domains. Experienced in native Android development using Kotlin, Java, Jetpack Compose, and MVVM/Clean Architecture, with additional experience in React Native. Strong expertise in building scalable, maintainable, and user-centric mobile applications while collaborating with cross-functional teams to deliver end-to-end features.

PROFESSIONAL EXPERIENCE

Software Engineer II, Lloyds Technology Centre 12/2023 – present | Hyderabad, India

- Led the end-to-end development of the **Spending Rewards** feature for the Lloyds banking app, including architecture, implementation, GCP API integration, testing, and production release, enabling customers to activate offers, redeem cashback, and track reward transactions.
- Designed and developed the feature as a **modular Android SDK** using MVVM, Clean Architecture, and Jetpack Compose, improving code reusability, maintainability, and independent feature development across teams.
- Reviewed pull requests, upheld engineering best practices, and collaborated with cross-functional teams to ensure high code quality, architectural consistency, and timely feature delivery.
- **Developed an AI-powered PR review assistant** to automate Android code reviews by enforcing organization-specific coding standards, Kotlin best practices, and testing guidelines, improving review efficiency and code quality.
- Delivered multiple post-MVP enhancements, including Featured Offers, Filter & Sort, Custom Intercept Surveys, and Cashback Transaction History, enhancing user engagement and feature discoverability.

Software Engineer, Educational Initiatives 09/2021 – 11/2023 | Bangalore, India

- Developed and maintained the Mindspark mobile application using React Native for Android and iOS, implementing features such as Trusted Device, OTP Login, Screening Test, Dual Login Flow, and interactive learning modules while ensuring a responsive and reliable user experience.
- Contributed to the development of the **EiAsset** native Android application, an assessment platform used by over **380,000 students annually**, enabling students to take online assessments, submit responses, and access detailed performance and leadership reports.
- Built Android features using **Kotlin**, **Jetpack Compose**, **MVVM/Clean Architecture**, **Dependency Injection**, and **Java**, focusing on scalable, maintainable, and testable code with unit testing.
- Integrated REST APIs, Firebase Crashlytics, and platform-specific Android components, while collaborating with backend teams to deliver secure and high-quality mobile experiences.
- Managed application state using Redux and MobX, implemented WebView-based learning content, and collaborated on Spring Boot microservices to support end-to-end functionality.
- Optimized application performance by upgrading the React Native version, reducing the APK size from **32 MB to 25 MB** by replacing third-party libraries with custom implementations, and eliminating SonarQube code smells to improve code quality and maintainability.

Software Engineer, MoneyTap 06/2021 – 09/2021 | Bangalore, India

- Developed and maintained core features for the MoneyTap Android application using **Kotlin**, **Java**, and Android Jetpack components, delivering a seamless and secure digital lending experience.
- Implemented and enhanced customer-facing features including user onboarding, authentication, loan application flows, profile management, and payment-related functionalities while ensuring high performance and reliability.
- Built scalable and maintainable application modules following **MVVM architecture**, **Repository pattern**, and **Clean Code** principles, improving code quality and maintainability.

Software Developer Intern, Appventurez Mobitech 01/2021 – 06/2021 | Noida, India

- Contributed to the development of the **AstroBaBa** Android application using **Java**, delivering responsive and user-friendly features for astrology and consultation services.
- Implemented Android components following the **MVVM architecture** and integrated **Room Database** for efficient local data storage and offline support.

- Integrated RESTful APIs, **Firebase Cloud Messaging (FCM)**, push notifications, and live chat functionality to enable real-time communication and improve user engagement.
- Collaborated with senior engineers to troubleshoot issues, optimize application performance, and ensure timely delivery of high-quality Android releases.

EDUCATION

Master Of Computer Application, 2018 – 2021 | Kerala, India
National Institute of Technology Calicut
CGPA - 7.94

Bachelor Of Computer Application, 2015 – 2018 | Patna, India
Admerite College (Magadh University)
Percentage - 64.2%

SKILLS

Android: Kotlin, Jetpack Compose, Coroutines, Hilt/Dagger, MVVM, Clean Architecture, Modularization, JUnit, MockK Cross-platform: React Native, JavaScript/TypeScript, Redux/MobX, Flutter (POC) Other: Java, SQL, Firebase, Git, GCP, Spring Boot, Mobile System Design, Data Structures & Algorithms, OOP, SOLID

LANGUAGES

- English
- Hindi

AWARDS

Engineering Excellence Award From Lloyds Technology Center (2026)
- Recognized with the Engineering Excellence Award (Q1) for proactive support, ownership, and resolving critical Android production issues.

Work Appreciation from Lloyds Technology Centre (2025)
- In appreciation of their exemplary behaviour and positive attitude aligned with the values and culture of Lloyds Technology Centre.

EI Maestro Award (Educational Initiative'23)
- For exceptional work in stabilizing the Mindspark Mobile App, reducing code issues, enhancing security, and delivering innovative solutions that significantly improved the product and development process.

Devathon Event in EI (2023) (Runner Up In Devathon)
- Reduced the production app size from 32 MB to 25 MB within two days by optimizing dependencies and replacing unnecessary third-party libraries in the React Native-based Mindspark application. Improved application performance by approximately 30% compared to the previous version.
